ProCore® Processor

TORO. Count on it.

Stress relief for you and your turf!

The ProCore® Processor

- OnePass hitch
- 70" processing width
- 35 hp engine
- Carbide chopper blade tips
- Full width rear roller
- Offset tow hitch option

The ProCore Processor is a new innovation that sweeps, processes and disperses aeration cores in one pass. Core aeration is vital to your turf's health, but highly disruptive to your staff and your operation. In a typical aeration cycle, 75% of your time and effort is spent managing cores after they are pulled. The ProCore Processor allows one operator to do the work of many, reducing the time and labor needed for large area aeration. The ProCore Processor will allow you to improve your turf by aerating more often and get the turf back in play sooner than any other method.

Count on Innovation

The exclusive OnePass hitch allows the ProCore Processor to be attached directly to your three-point aerator allowing one operator and one tractor to aerate and process cores in a true one-pass operation.

The tow hitch option allows for operation behind a heavy duty work vehicle or tractor. And offsets so you never run over cores.

A better solution.

The ProCore Processor is the only machine of its kind with enough power to satisfy even the most demanding conditions. The adjustable sweeper brush picks cores cleanly off the turf and a 35 hp engine delivers enough power to the chopper blades to pulverize every core in the most demanding conditions. The 70" processing width increases productivity and allows for even distribution of processed material, providing a uniform layer of native soil topdressing.

A 70" core processing width makes the ProCore processor the most productive on the market.

Long-lasting carbide chopper blade tips perform exceptionally well in a variety of soil types.

Accessories

Wheel Kit

The wheel kit provides extra support in soft or shallow rooted conditions.

Windrow Kit

The windrow kit allows for one pass operation with aerators wider than 70".

Slow Moving Vehicle Kit

The slow moving vehicle kit is for safety when transporting on roadways.

Specifications for ProCore[®] Processor

Engine

Model: Briggs Vanguard 2 cylinder, air-cooled
Rating: 35 HP (26.1 kW) Gross, 31 HP (23.1 kW) Net
Displacement: 993 cc displacement.
Filter: High filtration replaceable element air filter.
External spin on oil filter.

Capacities

Fuel: 10 gallon (37.9 liter)

Processing System

Belt driven nylon brush sweeps material into chopper assembly equipped with carbide tips.

Operating Speed

0-5 mph (0-8 km/h)

Roller

6" (15.2 cm) diameter full width rear roller

Construction

Welded steel frame

Hitch Systems

Exclusive OnePass hitch allows attachment directly behind 3-point aerator. Offset tow hitch allows attachment to heavy duty work vehicle or tractor.

Controls

Engine mounted key switch, choke and throttle. Remote mounted kill switch and offset control.

Tires

Transport tires: 6 ply, 18 x 9.5 - 8

Dimensions

Overall Width: 88" (223.52 cm)
Height: 44" (111.76 cm)
Length: 133" (337.82 cm) with OnePass hitch, 170" (431.8 cm) with Tow Hitch
Weight: 2200 lbs. (997.9 kg)

Certification: ANSI B71.4-2004, OSHA, CE and EU machinery directives

Warranty: Two year or 500 hour limited warranty. Refer to Operator's Manual for further details.

TORO[®] PROFESSIONAL SERVICES

Toro Financing A full service offering for all your equipment and irrigation purchases. Flexible financing options can be tailored to meet your operational needs.

Toro Protection Plus Extended Protection Plan Protect your budget and your equipment investment. Plans are available for both new and used equipment, and you can choose from various terms to fit your financing terms.

Toro Genuine Parts Keep the productivity and performance of your equipment at its peak. Learn about Performance Parts pricing and MVP kits. Find replacement parts online at Toro.com/partsviewer.

Toro Training Toro Factory Service Schools are available. Explore the training and customer care areas of Toro.com and ToroNSN.com for readily available education and training materials.

Toro Controller Repair Provides irrigation controller boards ready for immediate board exchange to assure that downtime is minimal and your turf stays protected. Toro is the choice for reliability.

Toro NSN[®] An industry-first support network that provides reliable, around-the-clock irrigation central control system trouble-shooting and operation assistance. Call 1-800-ASK-TORO.

NEW! myTurf[™] Fleet Management This on-line tool from Toro keeps track of maintenance for all of your turf equipment. Complete product information and parts ordering is also included. Ask your distributor for availability.

Products depicted in this brochure are for demonstration purposes only. Actual products offered for sale may vary.
