

# If You're Serious About Irrigation Efficiency, You Need The Toro® Sentinel® Water Management System.

Managing an irrigation system is no easy task; you must balance concerns such as manpower utilization, issue identification and repair, and landscape health. When you're ready to manage more efficiently, you are ready for Toro Sentinel.

**A Wide Array Of Controller Options** including enclosure types, station counts, standard or two wire decoder systems, conventional or solar power, and existing controller retrofit. Every controller is remote and flow sensor ready.

**Control That Fits Your Needs:** Flexible, two-way communications whether by radio, cellular, intranet, or a combination of these protocols. Remote System Access via the Web available with NSN® Connect™.

**Water Management Comes First** with ET- Adjustment from Web-based ET (Toro GEO-ET™) or on-site weather station, data reports from Turf Guard® soil monitoring, and Flow Monitoring & Optimization.

**Toro Irrigation Solutions**  
*Precise. Efficient. Practical.*
