

TORO

Count on it.

Technical Support

For Sentinel® Central Control Customers

NSN®

ALWAYS HERE FOR YOU WHEN YOU NEED HELP MOST!

Whether you need technical support, training, or just have an irrigation question, you can count on NSN for total operational confidence.

The most important part of a central control system is you, the person managing it. Toro NSN is dedicated to your support. We're available at the end of the day, in the middle of the night or at high noon. Whenever you have a problem or a question, Toro NSN is just a phone call away anywhere in the world, 24 hours a day, every day.

You can count on Toro for innovative irrigation products that are user-friendly and easy to operate. But, even with the best systems, expert advice and quick assistance are invaluable when the condition of your landscapes is critical. Even though most support needs can be resolved by a single phone call to NSN, if repair of central components is needed, that same call speeds whatever hardware or software is required to minimize any downtime and to keep your landscapes and reputation impressive in every way.

Whether you have an operational issue that requires quick remedy, you need advice on water conservation and time-saving techniques, or you need education and training for operators and field technicians, Toro NSN is always here for you.

24-hour, seven-day, 365 support. Worldwide, Toro NSN is always available to answer your questions, troubleshoot your system and solve your problems. And, if needed, our 24-hour central computer and component replacement service ensures minimal disruption to the operation of your irrigation system (U.S.).

The confidence of working with the best in the business. Toro NSN is a Microsoft® Certified Partner. Our support technicians are licensed irrigators. NSN has a diagnostic lab on-site for each irrigation platform, all field hardware plus ancillary products. The lab is used to duplicate field issues and investigate causes and solutions as part of Toro's commitment to continuous improvement. NSN is dedicated to irrigation—we know your business and expectations.

Industry-best training—classroom and web-based. NSN offers curriculum tailored to meet the range of user experience and proficiency. Classroom instruction is available at regional locations and at the NSN Training Center—where classes feature hands-on computer training and the operation of TORO hardware.

New system support, flexible options to renew. Every new Sentinel offering includes Toro NSN support. To protect your TORO investment long-term, choose a renewal option that gives you exactly what you need for continued reliable, cost-effective support and extended warranty, including equipment upgrades to keep your technology current and powerful.

Only Toro offers such irrigation system assurance and peace of mind.
